🏠 RENO, NV

Self-driven professional with more than 15 years of business impact, including directly generating more than \$1M in award-winning proposals and research-based product-driven solutions. Successfully transitioned across multiple technical domains with cross-functional experience working in agile-driven teams with stakeholders to design, develop, scale, and maintain SaaS and B2B products. Extensive experience in integration with and modernization of critical, platform-wide systems with zero downtime. Currently leveraging this diverse experience as an independent consultant, solving complex technical challenges for clients across multiple domains.

EXPERIENCE

RESEARCH & DEVELOPMENT NOV 2023—CURRENT

ABSTRACT MACHINES LLC
RENO, NV

Founded a business to guide clients through technical challenges, feasibility, process improvements, and bring products to market.

- Assisted an agency with landing an additional \$600K in revenue over the first 12-month period.
- Researched and designed a client's new marketing attribution model concept, including assistance with intellectual property filings in pursuit of a patent.
- Assisted with designing an early proof of concept for subterranean leak detection and estimating long-term development to get to market.
- Guided an agency on a new discovery process for early phase research as a new line of revenue and bringing in larger, technical projects.
- Trained new product managers and improved governance, estimation, and planning processes.

PRODUCT MANAGER

PROS
HOUSTON, TX (REMOTE)

MAY 2022—DEC 2023

Platform product manager of PROS B2B Data Management to modernize a transformational data platform company-wide.

- Led a team to turn around a multi-year, stalled project to its first production deployment while maintaining long-term roadmaps and coordinating company-wide platform integration resources.
- Piloted targeted cost reduction projects to save 94%, \$600K/year; Track volume-based costs to improve product packaging, maintain margin as the platform expands.
- Improved a customer data quality report, resulting in a 40% reduction in related support tickets.
- Promoted a consistent, product-led vision across all organizations and customers as an initiative owner on the Product team.
- Collaborated with stakeholders to define and prioritize product requirements; Drove product-focused requirements with technical teams for designs, estimates, and tracking efforts.

SR. SOFTWARE ENGINEER

LOOMIS - US
HOUSTON, TX (REMOTE)

SEP 2018—MAY 2022

Senior member of the small, product-focused SafePoint team dedicated to supporting all business critical applications.

- Modernized critical financial platform (tracks \$1B transactions/day) with zero downtime by researching, designing, and implementing a solution to re-architect core transaction systems.
- Worked closely with all stakeholders to assess risk and draft roll-out plans with recovery; assisted with designing and building a new event-driven platform with transparent legacy system integration.
- Coordinated with internal and external stakeholders on a customer onboarding pipeline. Customer Support increased productivity by over 60% with no staff increases.

TECHNICAL LEAD

PROGENY SYSTEMS
LAS VEGAS, NV

MAY 2010—SEP 2018

DoD researcher focused on drafting Small Business Innovation (SBIR) proposals, rapid prototyping, and feasibility analysis.

- Key developer and researcher on Phase I and II solicitations using OCR to digitize and trace schematics for safety procedures and maintenance on high-pressure systems.
- Specialized in designing and building modern solutions that integrate with secure legacy systems.
- Individually generated over \$1M in revenue (2016-2018) with award-winning research proposals.
 - Phase I and II awarded SBIR solicitations to modernize global Naval Fuel Depot Asset Management business processes. Successful productization of a first-of-its-kind mobile application to integrate with IBM Maximo.
 - Phase I awarded SBIR solicitation to support modern Naval galley kitchens with a mobile application for forms, guides, and on-site digital training.
 - Primarily authored and provided technical product guidance on a Phase I awarded SBIR solicitation for the Naval health and wellness information ashore and afloat.

SOLUTION-DRIVEN

- Drive products with a constancy of purpose
- Quality solutions are built, not inspected
- Focused, iterative improvements
- Implemented an array of SaaS/B2B solutions
- Proven work with critical systems integration
- Deductive decision, analysis, and resolution

HOLISTIC APPROACH

- Think systemically to answer why
- Situate problems as part of a greater whole
- Monitor feedback as the element of control
- Facilitate cross-functional collaboration
- Practice effective communication
- Empower team members to take ownership
