

GREGORY M. LAURENT

TECHNICAL LEADERSHIP • PLATFORM ENGINEERING • PRODUCT STRATEGY

775.300.9291

RENO, NV

GREG@ABMAC.IO

Two decades of technical leadership delivering measurable business impact, including **\$1.5M in award-winning proposals** and research-based product solutions. Deep cross-functional experience spanning SaaS, B2B, and B2G products, with a proven track record modernizing critical platform systems with *zero downtime*. Now applying that breadth as an independent research and development consultant to solve complex platform and infrastructure challenges for technical products.

EXPERIENCE

RESEARCH & DEVELOPMENT NOV 2023 — CURRENT

Abstract Machines LLC

Reno, NV

Founded consulting practice focused on technical leadership and mentorship for engineering and product teams. Guide clients through technical challenges, feasibility analysis, process optimization, and product delivery.

- Conducted R&D feasibility studies and proof-of-concept development for emerging technologies, including subterranean leak detection systems and novel marketing attribution models with IP/patent strategy support.
- Defined product strategy and roadmaps for clients bringing technical products to market, translating business objectives into development plans and go-to-market approaches.
- Guided agency through developing new discovery methodology for early-phase technical research, enabling them to land larger, more complex projects and generate \$550K in additional first-year revenue.
- Led and mentored cross-functional engineering and product teams across client engagements, training product managers on governance, estimation, and planning processes.

PRODUCT MANAGER

MAY 2022 — DEC 2023

PROS

Houston, TX (Remote)

Platform product manager for PROS B2B Data Management platform, leading modernization of transformational data infrastructure company-wide.

- Led a team to turn around a multi-year, stalled project, delivering first production deployment for company-wide data platform.
- Owned platform roadmap and drove cross-product integration strategy, coordinating resources across engineering and product teams.
- Piloted targeted cost reduction projects to save 94%, \$600K/year; Track volume-based costs to improve product packaging, maintain margin as the platform expands.

- Improved a customer data quality report, resulting in a 40% reduction in related support tickets.
- Collaborated with VP of Product to redesign product management processes, establishing company-wide standards for planning, estimation, and governance.
- Collaborated with stakeholders to define and prioritize product requirements; Drove product-focused requirements with technical teams for designs, estimates, and tracking efforts.

SR. SOFTWARE ENGINEER

Loomis - US

SEP 2018 — MAY 2022

Houston, TX (Remote)

Senior member of the small, product-focused SafePoint team dedicated to supporting all business critical applications.

- Modernized critical financial platform (tracks \$1B transactions/day) with zero downtime by researching, designing, and implementing a solution to re-architect core transaction systems.
- Worked closely with all stakeholders to assess risk and draft roll-out plans with recovery; assisted with designing and building a new event-driven platform with transparent legacy system integration.
- Coordinated with internal and external stakeholders on a customer onboarding pipeline. Customer Support increased productivity by over 60% with no staff increases.

TECHNICAL LEAD

Progeny Systems

MAY 2010 — SEP 2018

Las Vegas, NV

DoD researcher focused on drafting Small Business Innovation (SBIR) proposals, rapid prototyping, and feasibility analysis.

- Key developer and researcher on Phase I and II solicitations using OCR to digitize and trace schematics for safety procedures and maintenance on high-pressure systems.
- Led and mentored team of developers across multiple SBIR projects, training junior engineers on secure systems integration and DoD software requirements.
- Individually generated over \$1M in revenue (2016-2018) with award-winning research proposals.
 - Phase I and II awarded SBIR solicitations to modernize global Naval Fuel Depot Asset Management business processes. Successful productization of a first-of-its-kind mobile application to integrate with IBM Maximo.
 - Phase I awarded SBIR solicitation to support modern Naval galley kitchens with a mobile application for forms, guides, and on-site digital training.
 - Primarily authored and provided technical product guidance on a Phase I awarded SBIR solicitation for the Naval health and wellness information ashore and afloat.
